

versa robes

Your Space. Your Style.

Let's Get Ready for your Installation

Before Your Installation

Full payment must be finalised at least three (3) business days prior to the scheduled and agreed installation date.

If you need to change your scheduled date, please notify us at least three (3) business days in advance.

A rescheduling fee may apply if notice is not received within this timeframe.

Please ensure that any pre-installation tasks advised by our team have been completed.

This may include:

Removing items or making repairs as discussed.

Relocating power points where required.

On Your Installation Day

To allow our installation team to work safely and efficiently, please:

Provide clear access and parking close to your property.

Keep a clear walkway for materials to be carried through to the workspace.

Allocate a safe area for material cutting and preparation.

Ensure approximately half of the room is available for assembly.

Our team must wear safety footwear at all times while on-site. Work cannot be completed in areas that are cluttered or not prepared. Please remove all loose items and cover or protect anything that may be at risk of damage.

After Your Installation

Once the work is complete, the installer will advise how long any filler or sealant must cure before you begin using your new product.

Any rubbish generated by our team will be removed from site.
